Dualign
Leadership in Balance

What We Do & Engagement Options

Dualign is an executive and strategic advisory firm helping CEOs, founders, and boards of $5M–$500M companies align leadership behavior with enterprise strategy — so performance accelerates without cultural fracture.

Our approach is grounded in the **Heart & Head** framework: balancing emotional intelligence with analytical rigor to drive operational discipline and durable results.

ENGAGEMENT OPTIONS

STRATEGIC ENGAGEMENT

AI Governance & Operationalization

Governance frameworks, IP protection, P&L impact analysis, and agentic AI readiness. We translate between technical teams and the board.

Outcome: An AI North Star document and board-vetted governance framework — not another pilot that goes nowhere.

ONGOING ADVISORY

Operating Rhythm & Execution Discipline

Operating rhythms, review structures, and performance systems that keep execution on track. Decision velocity, accountability cadence, and measurable improvement.

Outcome: A repeatable operating cadence with built-in accountability, quarter over quarter.

12–24 WEEK EMBED

Fractional COO/CTO — Embedded Operating Leadership

Senior-level leadership embedded with your team. We don't just advise — we own the operating cadence, the right meetings, systems, and accountability.

Outcome: A professionalized operating system that runs without us.

STRATEGIC ENGAGEMENT

Inflection-Point Strategy & 90-Day Operating Plan

Strategic intent translated into a 90-day execution plan with decision rights, clear owners, and measurable targets.

Outcome: A prioritized roadmap your entire leadership team is aligned behind — so strategy drives results.

ONGOING ADVISORY

CEO/Founder Advisory — The Shadow COO

High-cadence 1-on-1 advisory and mentoring for the CEO who needs unfiltered truth, not polished presentations. Drawing from decades of wins, losses, and everything in between.

Outcome: Faster, higher-confidence decisions with less personal cost.

BOARD ROLE

Board & US National Security Governance

Corporate, advisory, and GSC board governance for FOCI-mitigated companies. Experienced navigating DCSA requirements, NISPOM compliance, and ITAR/EAR controls.

Outcome: Board-level governance that satisfies regulators, investors, and national security requirements — without slowing growth.

Dualign engagements are designed to create operational clarity fast, increase decision velocity, and reduce the hidden tax of leadership friction. The goal is a simple, repeatable operating system with clear owners, decision rights, and cadence that sustains performance and outlasts our engagement.

$450M+ Global Organization Led • **30+** Years C-Suite Experience • **2x** EBITDA Margin Doubled
